

THE JOURNEY TO
IMPROVEMENT
BEGINS HERE.

Quality Reviews

-  **Evidence-Based.** Third-party on-site reviews of academic programs conducted through classroom observation, document review, and interviews/focus groups.
-  **Research-aligned.** School practices are measured against SchoolWorks Quality Criteria – a research-based set of standards linked to positive student outcomes.
-  **Results-focused.** Each review includes verbal feedback and a written report that identifies strengths and areas of need to guide school and district improvement efforts or support high-stakes accountability.

SchoolWorks has reviewed 1,000+ schools, districts, and networks since 1998, helping identify the biggest levers of change.

-  **Beyond the Findings.** Most SchoolWorks reviews include a post-review action planning and prioritization session. During that time, SchoolWorks guides the school team through the process of developing an immediately useful action plan, based on review findings.

Other Types of Reviews

In addition to school quality reviews, we provide focused reviews such as curriculum reviews, instructional inventories, renewal site visits, monitoring site visits, and organizational assessments, as well as broader reviews such as district, network, and regional reviews.

What is required of schools?

It's our goal to disrupt learning as little as possible. Once the date is set, we provide you with a list of required documents, and use your school schedule to set up on-site activities (with your approval).

We meet your needs.

Talk to us. In general, our pricing is determined by student enrollment, the number of days on-site, and the length of the final report. A 15-minute phone call with our team can help us put together pricing that meets your needs and budget.
