

## OVERSEE AND IMPROVE QUALITY OF INSTRUCTION WITH A 100% REMOTE SYSTEM

### SchoolWorks Instructional Coaching, Supervision, and Evaluation System

Support, oversee, and manage the quality of instruction across your school in one convenient place – even when instruction is delivered in a remote or hybrid setting. SchoolWorks has teamed up with TORSH to provide a unique online framework for collaborating, performing observations, and delivering evidence-based feedback. Here's how it works:

**1 Set Up.** The SchoolWorks team provides administrators with training on the use of the platform and helps communicate instructions to teachers. The school team may opt to use their own classroom observation framework (such as Danielson), or may engage with SchoolWorks to become trained and certified in the SchoolWorks Classroom Visit Tool.

**2 Upload.** Following simple guidance, teachers upload videos of themselves teaching with corresponding artifacts (assignments, lesson plans, assessments, etc.) to the platform. Teachers may record “live” online lessons using the platform’s Zoom integration, upload video recordings of asynchronous lessons, or film in-person lessons. (Only a phone is needed for filming.)

*For a low per-person annual subscription, the SchoolWorks TORSH Talent platform provides a forum for communication, coaching and feedback between instructional leaders and teachers.*

**3 Observe and Improve.** Administrators logon to the platform to review instruction and provide feedback quickly and easily. Observers may even provide informal feedback to teachers by tagging moments in the lesson with pre-designated comments.

All ratings, artifacts and communications are archived within the system – so that progress may be easily tracked over time.
